Community Investments & Response to the 2020 Crises

Richard Williams, MD

Family Physician, Mountainview Family Practice

Associate Medical Director
& Board Governor, AllCare Health

About AllCare Health

- AllCare Health is a **Certified B Corporation** – dedicated to providing positive benefits to our community, employees, and environment.
- A family of companies that includes **AllCare CCO**, a southern Oregon Coordinated Care Organization.
- The AllCare CCO Board of Governors is a 21-member Board that has **50% representation from clinicians**, in addition to educators, healthcare administrators, and community members.

Our Service Area

Interdependence

allcare health®

Disaster Preparedness

- When the COVID-19 Pandemic and local wildfires occurred, AllCare Health was prepared to help because of:
 - Local relationships
 - Understanding of the needs of community

MASLOW

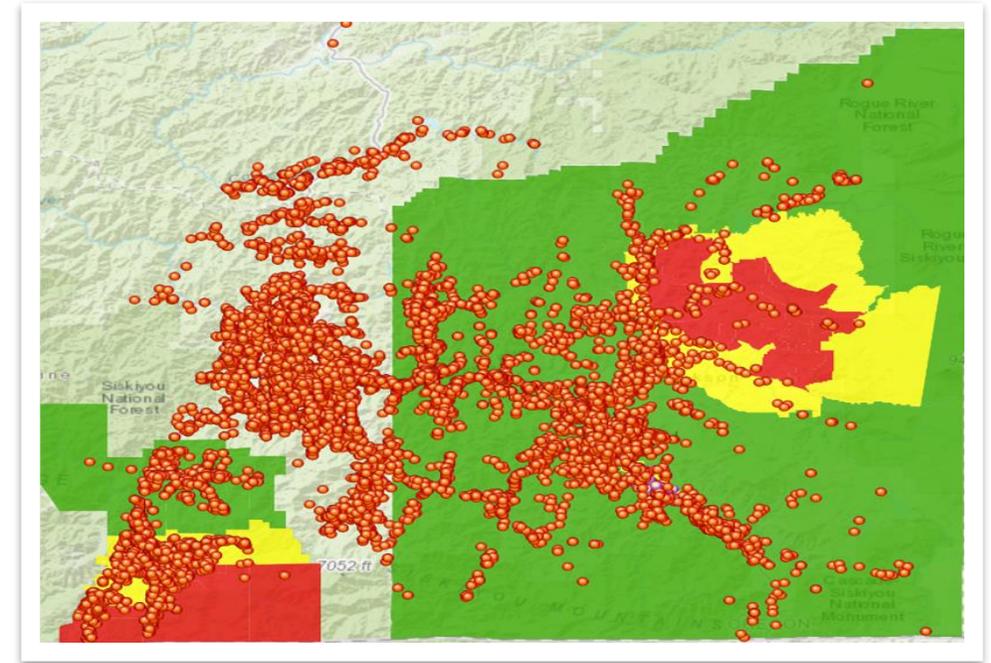

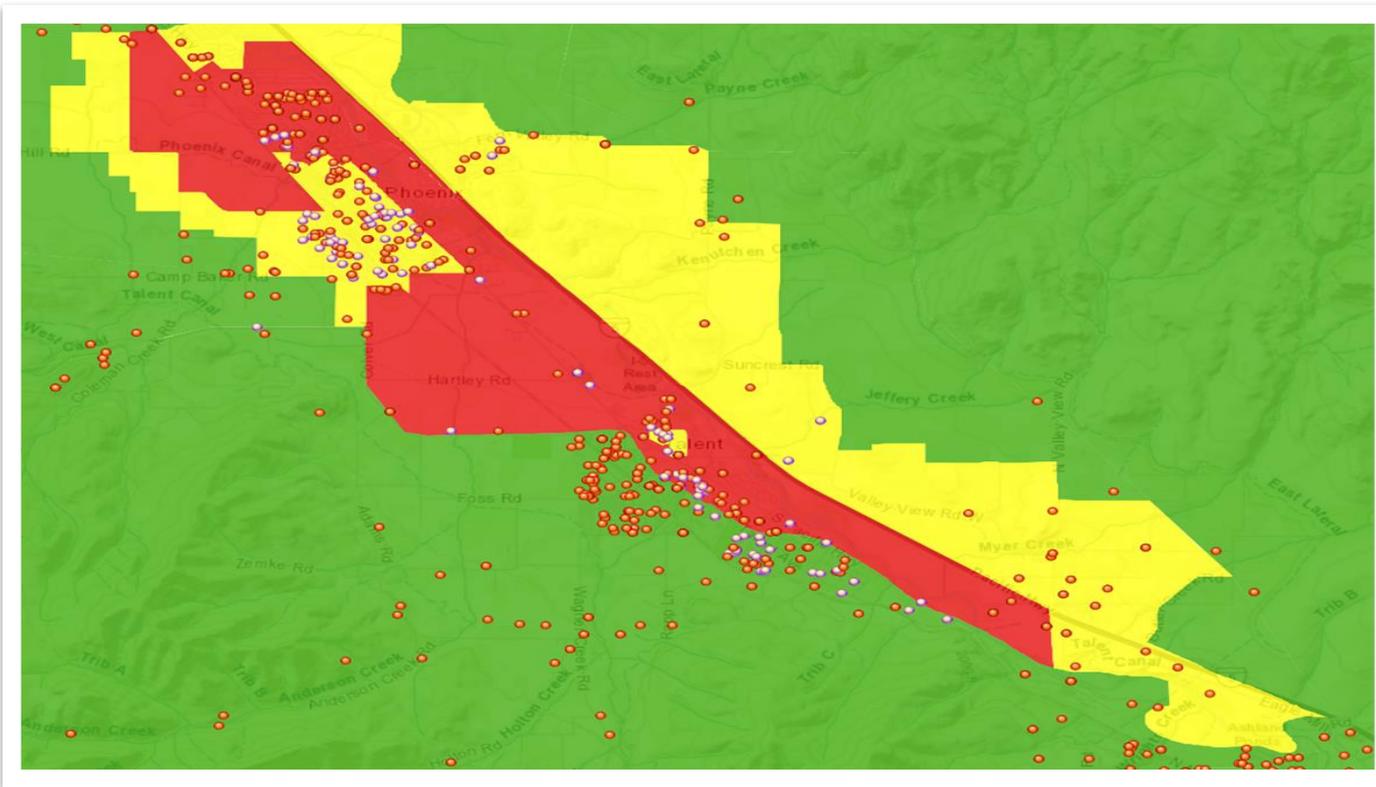

PROJECT

COVID-19 Investments

- AllCare invested approximately \$2 Million into the local community to support the immediate needs of:
 - **Providers**
 - Continued Capitation Payments to Primary Care Providers
 - Increased frequency of PCPCH payments from quarterly to monthly
 - Early release of Alternative Payment Model (APM) Payments
 - Grants awarded to specialists
 - Establish telehealth capabilities
 - **Community Benefit Organizations**
 - Grant funding to improve capacity and/or to stabilize services that promote health

Wildfire Supports

- AllCare quickly identified impacted members using real-time geomapping.

Alameda Fire (left),
all evacuation zones (above)

Representative Pam Marsh

Oregon State Representative
District 5

Almeda Fire, September 8

The Alameda Fire: A humanitarian crisis

- **The September 8 Alameda fire destroyed 2,500 homes in southern Oregon. Approximately 1,700 of these were individual homes in manufactured or RV parks.**
- **This was the community's naturally occurring affordable housing, serving seniors, low and moderate income workers, and our Latinx families.**

Lessons from the ground

- **Astounding community response provided immediate assistance.**
- **Communication challenges limited our ability to find and assist survivors.**
- **What was lost can only be replaced with significant public investment.**
- **Pain and trauma is manifested on both the individual and community level.**
- **Climate change is real.**

Dental Care Visits

How does this week compare to what is typical in your practice, in terms of... *

Total Patient Volume

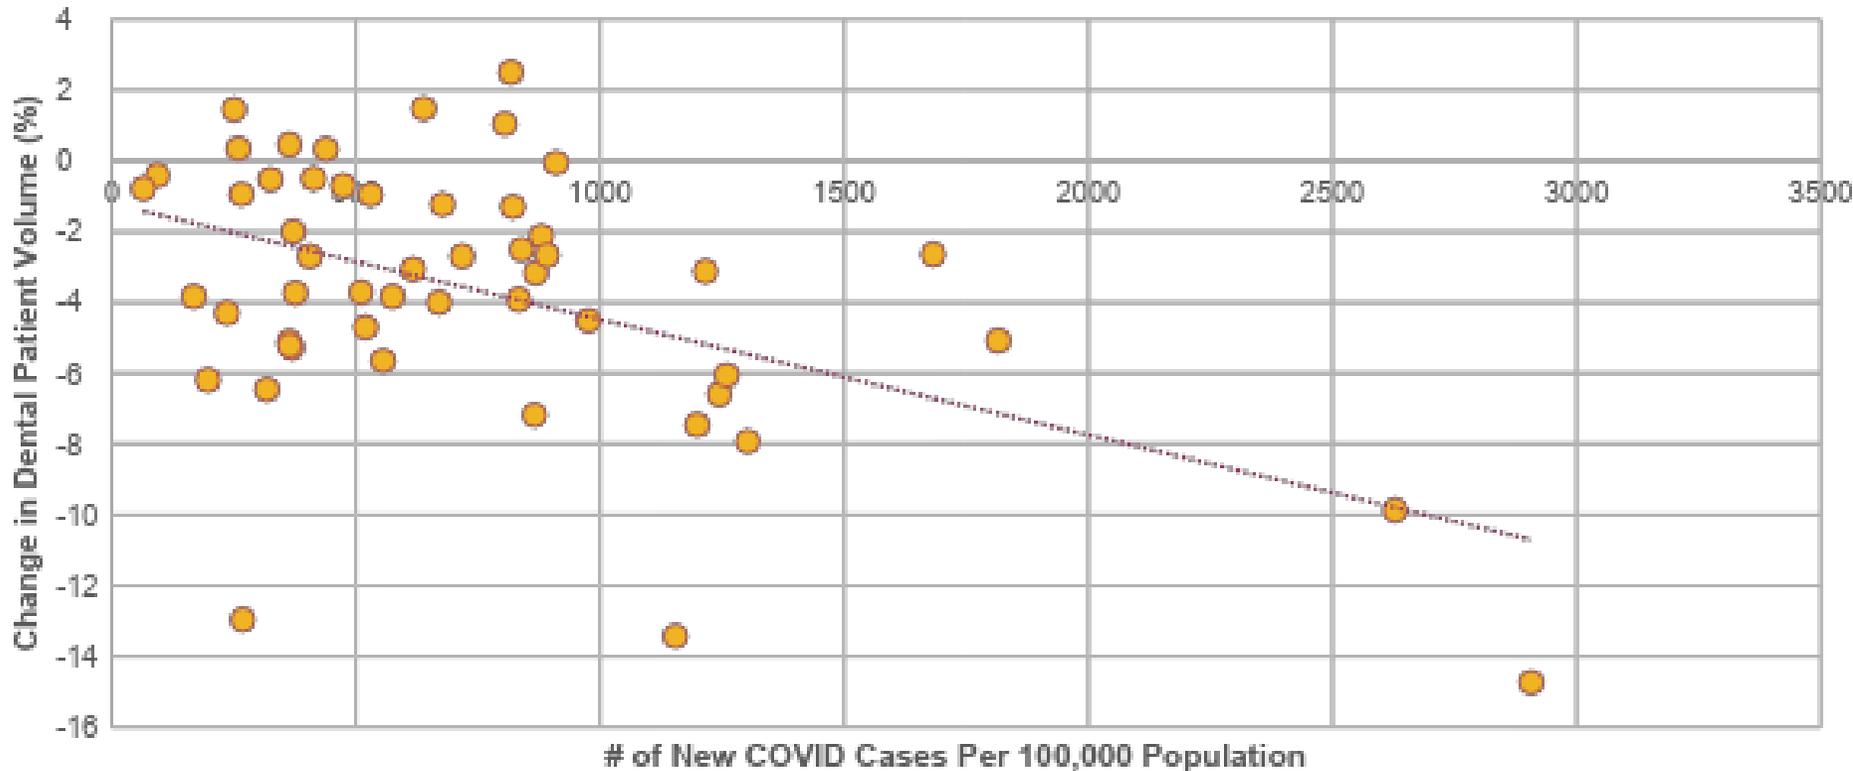

Insight: Patient volume in dental practices was at 77% of pre-COVID-19 levels the week of November 2nd.

In Oregon it was at 81% of pre-COVID-19 levels and has been stable.

COVID-19 Cases and Patient Volume

Is Dental Patient Volume Correlated with the Number of COVID-19 Cases among the Population?

October 5 - November 2, 2020

Insight: There is a fairly weak relationship between growth in COVID-19 cases and dental patient volume at the state level.

In Oregon, cases are growing slower than in most states and dental patient volume is stable compared to declining in most states.

Ongoing Infection Tracking Study

Original Contributions

Cover Story

Estimating COVID-19 prevalence and infection control practices among US dentists

Cameron G. Estrich, MPH, PhD; Matthew Mikkelsen, MA; Rachel Morrissey, MA; Maria L. Geisinger, DDS, MS; Effie Ioannidou, DDS, MDS; Marko Vujicic, PhD; Marcelo W.B. Araujo, DDS, MS, PhD

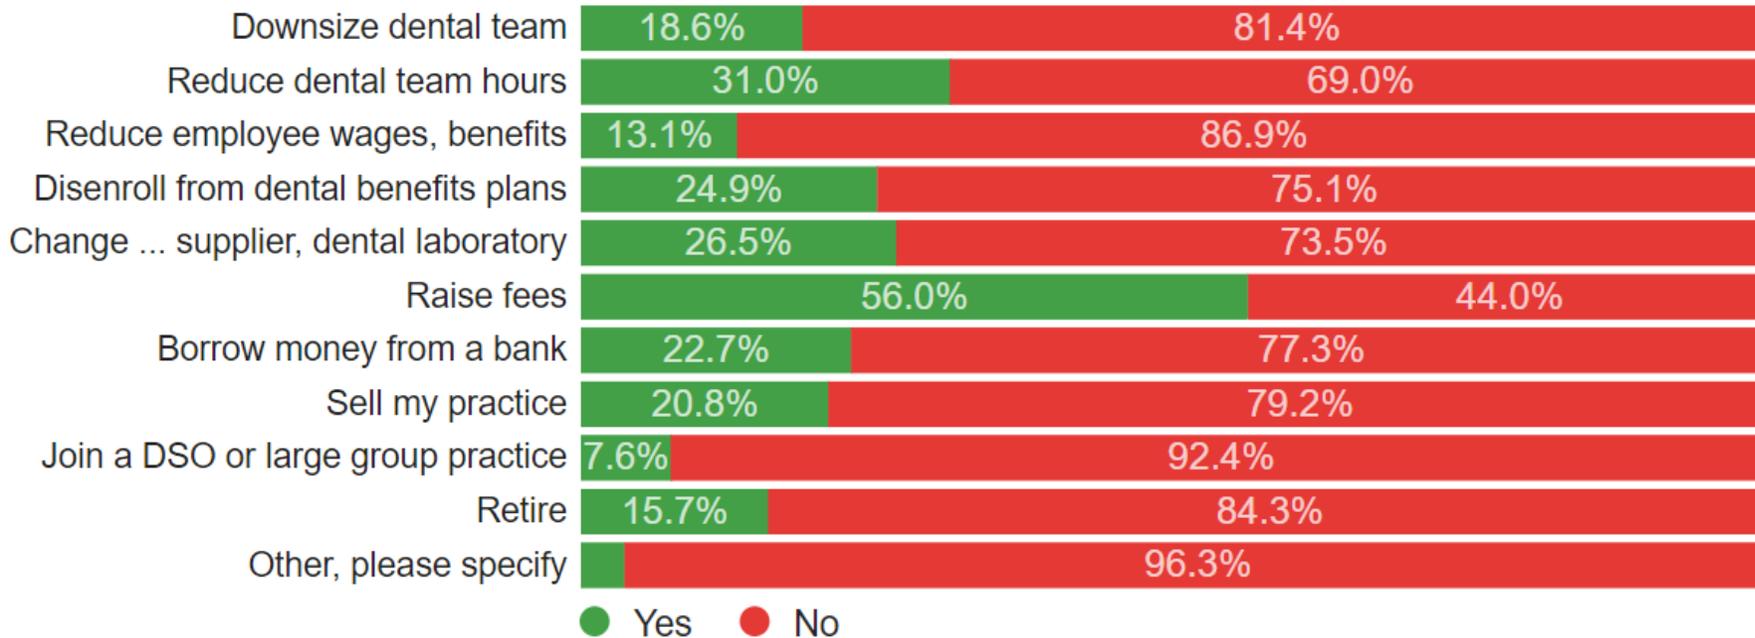

As dentists reopened in late spring, very few got Covid-19, survey finds

Early on in the pandemic, it was widely believed that dentists would be at high risk of contracting Covid-19.

Impact on the Dental Workforce

Assuming your patient volume remains what it is through the end of the year, would you seriously consider any of the following *additional* measures?

Insight: Dentists are likely to raise fees and reduce their dental team's hours if patient volume remains flat.

About 1 in 5 are likely to sell their practice, including about 1 in 6 who are likely to retire.

About 40% of dentists 65 and older indicated they would retire.

ROI of Investing in Oral Health

"The appearance of my mouth and teeth affects my ability to interview for a job."

About CareOregon

Community led care

- Serves 450,000 Oregon Health Plan members
- Members are located in CCOs in the Portland metro, north coast, and southern Oregon areas; we additionally serve Oregon Tribal members enrolled through open card
- Each region is locally led, community driven and 100% focused on delivering community responsive care

High Risk Member Outreach

Using COVID response to improve access to care + integrate behavioral health

- Identified approximately 55,000 members who could benefit from direct outreach in response to COVID-19
 - Provided foundation for Wildfire response as well
 - Uncovered significant social needs
- Worked with clinical networks to conduct outreach. Member outreach was led by the organization with the closest relationship with the member.
- Conducted phone outreach and if could not be reached sent information by mail that covered:
 - **Educational:** Here's what happening with COVID-19
 - **Wellness check:** How are you doing, do you know how to access care
 - **Social Determinants of Health:** Do you have what you need to stay healthy and if not, can we connect you with resources

Intervention	Specifics
Technology	Paid for devices and delivered
Personal Protective Equipment	Procured and delivered
Durable Medica Equipment	Facilitated delivery
Food/Household Items	Increased Community Benefit Organization/ partnership/ increased use of Health-Related Services Fund
Information	Standard outreach communications for teams to use High Risk Tool Kit
Telehealth	Providers-payment Members-device/ internet access (especially BH)
Regional Care Team	CO teams to assist with care coordination
Panel Coordinator Program	Embedded CO staff who support clinics with metrics/preventive care outreach
Provider Stability Payments	Help support providers as utilization dramatically reduced to preserve access to care

Delivering on CCO 2.0 Metrics + Scoring

Leveraging our crisis response to build infrastructure needed for CCO 2.0

- How to maintain continuous quality improvement to build on transformative work CCO Metrics program has achieved
- We know care has been deferred so even more important to ensure chronic, acute AND preventive care occurring
- Need to ensure that metrics continually push transformation as well as making an equity approach a priority

SDOH: Building Community Capacity

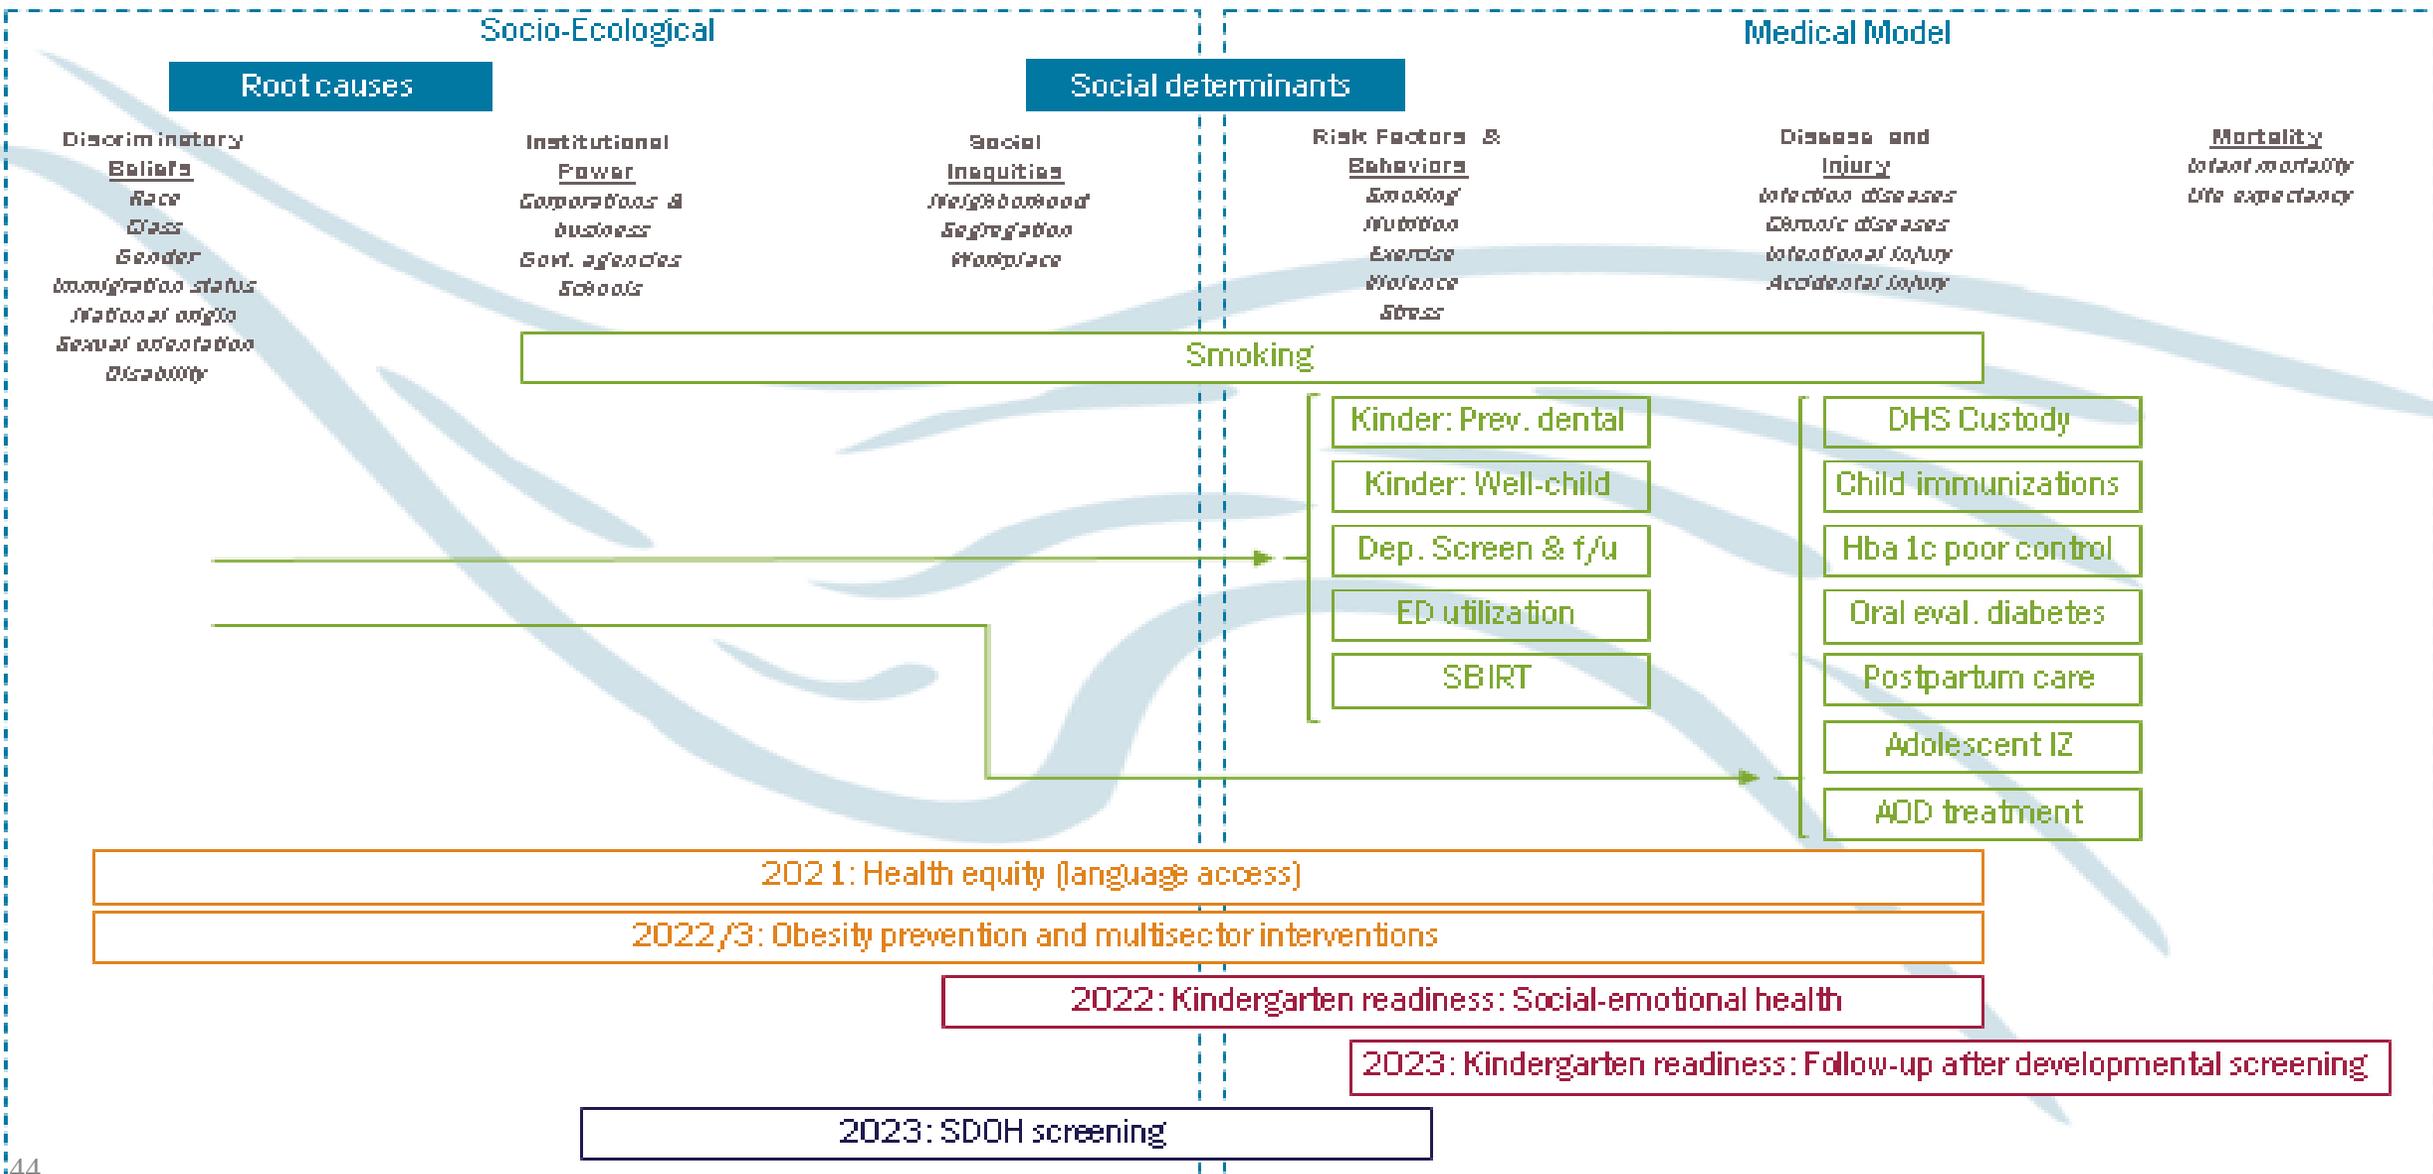

Partnering with and financially supporting community-based organizations

- Focused on deepening relationships with community organizations that serve our members
- Distributing ~\$2.5 million in grants to local organizations, selected by staff living in each region we serve
- Creating and funding a program to support community-based organizations using Traditional Health Workers to best serve our members

For discussion, DRAFT: CCO Incentive Measures Over a Framework of Health Equity

BOLETÍN DE SALUD PÚBLICA
Comunicación de emergencia COVID-19 - 2 de mayo

Pruebas de COVID-19: ¿Realmente se está expandiendo el acceso?

Por Kelly Smith, DO - Allcare Health

La respuesta breve es: "Sí, el acceso está aumentando".

A la larga de la pandemia de COVID-19, la disponibilidad de pruebas y resultados se ha ido expandiendo rápidamente. Esto también se ha debido a muchos factores. En el Estado de Oregón, los proveedores de pruebas y los centros de pruebas municipales de salud pública han trabajado juntos con diligencia para ampliar el acceso a las pruebas. Como resultado, podemos anticiparnos de que aumentará esta capacidad de pruebas en todo el estado, más individuos tendrán la oportunidad de ser probados.

El 1 de mayo, el Estado de Oregón emitió estas directrices actualizadas que abarcan nuevos detalles que debe cumplir el individuo para ser sometido a prueba. Estas especifican a quién se le debe hacer la prueba y a qué individuos se les debe hacer la prueba.

Además de las nuevas directrices emitidas, el Estado de Oregón a través de un estudio más amplio de la población, en colaboración con Oregon Health and Science University, comenzó a probar a más de 100,000 personas en todo el estado y mejoró nuestra capacidad de probar a más de 100,000 personas al día.

Su proveedor de atención médica es quien mejor puede decidir si debe hacerse la prueba. Ellos pueden usar la información más actualizada disponible sobre la efectividad de la prueba y las pruebas de pruebas más recientes. También puede preguntarse de qué manera, entre ellas, su proveedor de atención médica tendrá en cuenta si se ha tenido algún contacto con otros personas con COVID-19 confirmado.

A partir del 1 de mayo de 2020, las pautas del estado presentan los siguientes síntomas para la prueba de COVID-19:

Los síntomas que coinciden con la COVID-19 son:

- Tos o falta de aliento o dificultad para respirar
- Tos o falta de aliento o dificultad para respirar
- Al menos dos de los siguientes síntomas: fiebre, escalofríos, temblores repetidos con escalofríos, dolor en los músculos, dolor de cabeza, dolor de garganta, o pérdida reciente del gusto o del olfato.

Si desea leer la Guía de Pruebas para Proveedores más reciente, por favor visite <https://dhs.oregon.gov/dhsa/health/state/or-us/DHSForms/Service/102267.pdf>

Un cambio en el informe de los casos de COVID-19

En respuesta a los cambios realizados en el informe de COVID-19 por la Autoridad de Salud de Oregón, el condado de Josephine comenzará a publicar el número de casos por semana en lugar de incluir en la actualización de la publicación las categorías de casos: confirmados y no confirmados.

Los casos probados son aquellos que una prueba diagnóstica muestra que COVID-19 y fueron un resultado positivo con COVID-19. Si un individuo con un resultado positivo de COVID-19 no tiene un resultado positivo de COVID-19, esto indica que el individuo no tiene COVID-19. Sin embargo, si un individuo con un resultado positivo de COVID-19 no tiene un resultado positivo de COVID-19, esto indica que el individuo no tiene COVID-19.

La OHA también tiene un cambio en el informe de COVID-19 del condado de Josephine. El condado de Josephine comenzó el 2 de mayo que el informe de COVID-19 del condado de Josephine se actualizará con los datos de COVID-19 del condado de Josephine.

COVID-19 es una enfermedad infecciosa y contagiosa que afecta a las personas de todas las edades. El condado de Josephine comenzó el 2 de mayo que el informe de COVID-19 del condado de Josephine se actualizará con los datos de COVID-19 del condado de Josephine.

COVID-19 es una enfermedad infecciosa y contagiosa que afecta a las personas de todas las edades. El condado de Josephine comenzó el 2 de mayo que el informe de COVID-19 del condado de Josephine se actualizará con los datos de COVID-19 del condado de Josephine.

EVITE LA PROPAGACIÓN DE COVID-19

Por favor, ayúdenos a mantener nuestra comunidad saludable para todos

- Lávese las manos
- Quédese en casa si está enfermo
- Póngase un cubrebocas
- Practique distanciamiento físico

¡Usted puede ayudar evitar la propagación de COVID-19!

Opportunities

Language Access at Wildfire Shelters

The Future

Lessons Learned

- Need to increase interpreter resources in certain areas.
- Increase vital information available to LEP community
- Provide education to LEP community on resources and empowerment for them regarding language access needs
- Learning from the community on their needs
- Continue to provide linguistically and culturally appropriate services
